CANTILEVER RACKING

Cantilever racking is primarily used for storing long, awkward and oversized goods. This type of racking system provides maximum storage capability with easy accessibility. It is available in both single-sided and double-sided configurations. There are two surface coating options: powder coated for indoor applications and hot dipped galvanised for outdoor applications. These cantilever systems are designed in accordance with FEM 10.2.09 The design of cantilever racking.

Typical storage applications include:

- Plywood/chipboard
- Timber
- Sheet metal
- Tubing
- Aluminium extrusion
- Furniture
- Structural members
- ...and much more

C200 CANTILEVER RACKING

Also known as light duty cantilever racking, this racking is designed for lighter storage requirements. The arm ratings typically vary from 250kg/arm to 450kg/arm, depending on the arm length and configuration of the cantilever system.

	POWDER COATED	GALVANISED
Post Height	2000mm 2400mm 3000mm 3600mm 4200mm	2000mm 2400mm 3000mm
Arm Length	700mm 900mm 1200mm	700mm 900mm
Bracing / Spacing	900mm 1200mm 1500mm 1800mm	900mm 1200mm 1500mm 1800mm

MEDIUM AND HEAVY DUTY CANTILEVER RACKING

This cantilever system utilises posts section sizes of either a C305, C350 and C410mm sections, and are a common storage solution for storing a variety of building & construction materials. Typically, the arms are rated to a capacity of 1000kg UDL, but this may vary depending on arm length and racking configuration. By offering a C305, C350 and C410 section sizes, we can cater for lower or higher loads in a single column, and so a safe cantilever system can be designed according to your needs and budget.

	POWDER COATED		GALVANISED	
	C305	C350	C305	C350
Post Height	3048mm 3658mm 4267mm 4877mm 5486mm 6096mm	4877mm 6096mm 7315mm	2438mm 3048mm 3658mm 4267mm 4877mm 5486mm 6096mm	4877mm 6096mm 7315mm
Arm Length	900mm 1200mm 1500mm	1200mm 1500mm	900mm 1200mm 1500mm	1200mm 1500mm
Bracing / Spacing	900mm 1200mm 1500mm 1800mm 2100mm		900mm 1200mm 1500mm 1800mm	

LONGSPAN SHELVING

Longspan shelving provides an inexpensive storage solution ideal for a range of applications such as box or archive storage, storerooms, parts storage, workshops and workbenches. Available in a variety of shelf types, chipboard and mesh deck is commonly used for general purpose applications and the steel galvanised deck is generally used for grocery applications, so spillages can be easily wiped clean.

GALVANISED RIVET SHELVING

Galvanised rivet shelving is used for a variety of applications including box or archive storage, and workshops. Its electro galvanised surface treatment makes it ideal for cool room shelving. Available in a variety of shelf types, the chipboard is commonly used for general purpose applications and the steel galvanised deck and mesh deck is generally used for grocery applications or cool rooms.
